Edorado's innovative platform is designed to cater to a multitude of marine industry segments.

The hydrofoil electric platform with integrated retraction offers a flat floor that opens up new possibilities for customization. Design and engineer your own unique watercraft, tailored to your specific needs and preferences. This flexibility empowers you to create vessels that are as unique as the customers you serve.

Canard Configuration	Fully Integrated UI	2 x 40 kWh Batteries
Integrated Retraction	No protruding foil tips	2x Torqeedo Deep Blue 50
100% Electric	Sleek Azimuth pods	Energy Use: 1.08 kWh/ km – 2 kWh/ nmi
Twin Drive	Closed cooling system	Take-Off: 29.6 km/h – 16 kn
Collision Impact Safety System (CISS)	Easy Storage & Trailing	Top Speed: 70 km/h – 38 kn

### Application

- Universal platform that can be freely completed for your mission profile.
- Freely divisible flat floor space.
- 3D files and integration specs provided.
- Easy software integration.
- Cost efficient solution.
- Limited variables to consider.

### Engineering support

Edorado acts as support, helping you stay within parameters. Forces are well defined so your naval architect can easily engineer a structure around it. Custom solutions upon request.

### Assurance

- Proven concept.
- Proven Automatic Control System.
- Proven code.
- Proven electronics.
- Proven mechanics.
- Patented CISS.
- Powered by Torqeedo.
- Dedicated After Sales Team.
